VOL. XXXIII, NO. 23.

THE BLAIRMORE ENTERPRISE, FRIDAY, JULY 17, 1942.

\$2.00 PER ANNUM

"Serve the Church that the Church May Serve You"

**CENTRAL UNITED CHURCH**  
BLAIRMORE

Rev. E. B. Arrol, B.A., Minister

Services Sunday next:  
10.00 a.m., Junior school.  
7.30 p.m., Public Worship.

**ST. LUKE'S CHURCH, BLAIRMORE**  
Rev. J. R. Hague, A.Th., Incumbent

Services discontinued until Sunday, August 16th, 7.30 a.m.

**SALVATION ARMY, COLEMAN**  
Lieut. R. D. Marks, Officer in Charge

Sunday services:  
10.30 a.m., Y.P. Directory Class.  
11.00 a.m., H-Union Meeting.  
8.00 p.m., Sunday School.  
7.30 p.m., Salvation Meeting.  
Tuesday: 7.30 p.m., Red Shield Auxiliary and Home League.  
Thursday: 8 p.m., Praise Meeting.  
Funerals and dedications on application to the local officer.

**NEWSPAPERMEN LISTED**  
UNDER SECTION 15  
OF WAR REGULATIONS

Ottawa, July 14. — Newspapermen have been listed under section 15 of the national war services regulations. This section provides that from time to time the minister may furnish to selective service boards lists of industrial or servicing activities deemed to be essential to the successful prosecution of the war. An employer engaged in any activity so listed is termed a "war industry."

Newspapermen coming under the listing are defined as follows:

"Members of editorial staffs, including editorial executives, reporters, technical men and artisans and other men whose services are essential to getting out newspapers, weeklies, monthlies and other publications."

In connection with the listing, War Services Minister Thomson said today:

"The listing of any activity under section 15 does not mean automatic postponement of service for the persons engaged in that activity. On the listing of any activity under section 15, the board has power to entertain and deal with applications for postponement. Each case will be dealt with by the appropriate board on its merits and in the light of the facts surrounding the application for postponement."

St. Alban's Anglican church, Coleman, was the scene of a pretty wedding on July 1st, when Alma Wilton Penney, of Coleman, became the bride of Pte. Charles Roughhead, son of Mr. and Mrs. W. Roughhead, also of Coleman, Rev. J. R. Hague officiating.

## SUCCESSFUL MUSIC STUDENTS

The following is a list of successful candidates in examinations recently held by the Toronto Conservatory of Music in Blairmore, arranged in order of merit:

PIANO, Grade X.—Kathleen Turner, pass.

Grade IX.—Donald P. Graham, honors.

Grade VII.—Elsie Arrol, first-class honors; J. Stanley Kirk, pass.

Grade VI.—Patricia Evans, first-class honors; Frank Hoesek, honors.

Grade V.—Elaine Korman, honors; Jean Thewlis, pass.

Grade IV.—Barbara Millett, first-class honors.

Grade III.—Lorene M. Hobson, first-class honors; Mary Bath, pass.

Grade II.—Josephine Aristone, Ronald Calogrosso, Lorraine Van Marion, equal honors; Kenneth Seaman, Christine Smith, equal honors; Lillian Robinson, honors.

Grade I.—Lloyd Drake, honors; Doreen Aitken, pass.

VIOLIN, Associateship A.T.C.M.—Frank Hoesek, first-class honors.

Grade IV.—Elsie Arrol, first-class honors.

Grade II.—Stanley Kirk, first-class honors; Peggy MacPherson, Terry Corrigan, Milan Dancs, Lloyd Drake, equal honors.

Grade I.—Valeria Martinek, first-class honors; Frankie Mascara, honors.

And the following were successful in examinations conducted by Dr. J. Frederick Stator for the Royal Schools of Music, London, England. All are pianoforte students, unless otherwise designated:

Georgette Mary Dae, L.R.S.M. performer certificate.

Albert Christie, Alice Minunzie, pass Grade VIII.

Frank McLaugherty (violin) Grade VII, pass with distinction; Eileen Hope McDonald, pass with credit.

Clare Lenore Dae, Grade VI, pass with distinction; Annie Dredzick, Margaret Smith (both violin) pass with credit, practical only.

Frances Mison and Gordon Roper (violin) Grade V, pass with credit; John Chamberlin, Cyprian Guril (violin) pass.

Jerry Koran, Edward H. Moser (both violin) pass Grade IV, with distinction; Georgette Dau, John Graham (both violin) and Margaret Smith, pass with credit; Robert Dau (violin) Norman Hopkins, Hugh Oliver (violin) pass.

Albert Christie, Claire L. Dae, Eileen McDonald, Kathleen Turner, pass Grade IV, grammar of music.

Stanley Kish, Shirley Montalbet, Jackie Patterson (violin), Audrey Jean Pinkney, Mary Clare Steeves, pass with distinction in Grade III; Kaye F. Lillie, pass with credit; Lloyd Pinkney (violin) pass.

Jean Moser, Ruth Stobbs, pass with distinction in Grade II; Ernest Fanthin (violin), Joan Johnston, Camilla Porochuk (violin), pass with credit; Ronald Fantin (violin), Betty McNeil, Fraser MacPherson (violin), pass.

Geraldine Kemp, John Laluk (violin), pass with distinction in Grade I; Kaye F. Lillie, Erasmo Pavan (both violin), pass with credit; Frances Gra-

## CANADIAN BOMBERS BOUND FOR RENDEZVOUS WITH ENEMY

Rolling off the assembly line in a Canadian aircraft plant, these twin-engine Bolingbroke bombers are moving swiftly toward a rendezvous with the enemy. Production of bombers, fighting and training aircraft in Canada has grown to impressive proportions since the early days of the war when the Canadian aircraft industry was in a pioneer stage. Canadian workmen are turning out five types of training planes, supplying the vast British Commonwealth Air Training Plan; two types of service planes, which are regarded as first-class fighting machines, and the Link trainer for preliminary ground instruction.

## COWLEY HAPPENINGS

Mrs. L. W. Colvin and small daughter of Port Nicoll, Ontario, are paying an extensive visit with relatives in this district.

Miss Elaine Elton, of Calgary, has returned home from paying a visit to Mr. and Mrs. Cecil Elton at their ranch home in the Todd Creek district.

Mrs. Doris Sandeman left on Sunday's train for a two weeks' visit at New Westminster and other western points.

Mrs. Warriner and daughter Patty are guests of Mr. and Mrs. Michael Eiken.

Miss Helen Maloff, after spending about a month with relatives at Drumheller, and a week at the Calgary Stampede, arrived home on Wednesday with her sister Nora, who also took in the Stampede.

Mr. and Mrs. Papp and their family of five children left on Thursday's train on a holiday trip to Toronto and other eastern points.

Mr. and Mrs. Arthur Tustan took in the Calgary Stampede last week.

Harold Cleland and sons Roy and Dennis, of Vauxhall, spent two weeks holiday with relatives and friends in the Porcupine Hills district, and returned home during the week.

James Lote and Hector Lemire were week-end visitors to Calgary, attending the Stampede on Saturday. They report heavy rain making holidaying disagreeable.

A miscellaneous shower was held in the Masonic hall on Monday night for Mr. and Mrs. Duart Smith, newlyweds. Mrs. Smith was formerly Edith Connelly, of Spring Creek. Entertainment for the early part of the evening took the form of cards, progressive whist being played. Prize winners were Mrs. M. A. Murphy, ladies' first; Mrs. Jerome Robbins, consolation; Bert Connelly, gents' first; Duart Smith, consolation. M. A. Murphy was master of ceremonies. The prizes were donated by Mrs. Harry Gunn. After an appetizing luncheon, the presentation speech was made by Michael Elton, when the honor guests, who were seated at the head table, received a number of useful and beautiful gifts from a host of friends who had gathered on this auspicious occasion to do them homage. Mr. Smith, in fitting words, replied, thanking everyone for their kindness. A lively dance followed, with music being supplied by Mrs. Arthur Tustan at the piano.

The new basic training centre for soldiers at Wetaskiwin is to be opened on October 1st.

Fred Thell, well known Macleod tailor, is suffering from a badly sprained leg.

## SUGGESTION FOR INFLATION BARRED

Ottawa, July 16.—Finance Minister Lley in the House of Commons last night flatly rejected the proposal of Arthur Slaght, Liberal, Parry Sound, that the government should issue \$1,200,000,000 in national currency to assist in war financing and lessen the interest burden.

The minister said he would rather resign his position than accept such a proposal.

Social Credit (or New Democracy) members applauded the proposed scheme.

The Pincher Creek council has donated \$20 to the Salvation Army and \$50 to the Calgary Old Folks' Home.

A class of seven, prepared by Sisters Ste. Stephanie and Ste. Regina of Blairmore, received their first communion at Ste. Cecilia's Catholic church last Sunday. Rev. Father Timothy Murphy conducted the service.

Most Rev. F. P. Carroll, bishop of Calgary, will conduct confirmation services in the fall.—Nanton News.

Opening of hearings on operations of the Workmen's Compensation Act at Edmonton this week brought wide interest to bear on this important social legislation. Nine briefs had already been received by the legislative committee, and the first to be given verbal support was that by the joint legislative committee of Standard Railway Brotherhoods. The committee will sit this week, then will adjourn until a later date. It is likely that members will visit various industrial establishments to view safety features, since they are on record as favoring the utmost safety precautions in all classes of work.

## BLAIRMORE TO HAVE KIDDIES' WADING POOL

At a special meeting of the Blairmore Lodge of Elks on Friday evening last, it was decided to undertake the establishment of a kiddies' wading pool in the parkside between Victoria Street and the C.P.R., immediately opposite the Orpheum theatre. The pool will simply be a wading pool, with water ranging from hill to about eighteen inches in depth, to be built of cement, with suitable dressing or shelter facilities. Last year provision was made by the local lodge whereby the Blairmore kiddies could avail of the facilities at the Turtle Mountain Playgrounds at a special reduced rate.

Tenders are now being invited for the construction of the new pool, and work will be undertaken very shortly.

We understand that an offer of co-operation is expected from the town council.

Under terms of an order-in-council recently passed by the Alberta government, free hunting permits will be issued to men on active service in the province desiring to bag game in season.

The soldier wishing to take advantage of the generous offer has only to bring a letter or certificate from the officer commanding his unit, giving particulars of service, and the game branch will do the rest.

It is suggested that those wishing to avail themselves of this special permit should first get in touch with the game branch, when all information will be gladly supplied.

Opening of hearings on operations of the Workmen's Compensation Act at Edmonton this week brought wide interest to bear on this important social legislation. Nine briefs had already been received by the legislative committee, and the first to be given verbal support was that by the joint legislative committee of Standard Railway Brotherhoods. The committee will sit this week, then will adjourn until a later date. It is likely that members will visit various industrial establishments to view safety features, since they are on record as favoring the utmost safety precautions in all classes of work.

**For Increased National Efficiency EAT MORE BREAD!**

CANADIANS—whose health record is high among the nations—obtain one-quarter of their food energy from bread.

Especially if your work requires quick or sustained energy, you should eat plenty of bread with each meal.

Bread is rich in carbohydrates and, made with milk, as it usually is today—bread is an important source of protein, equal to meat in muscle building and repair.

Est more of this energy-giving food and increase your efficiency for today's emergencies!

YOUR BAKER'S SKILL, scientific equipment—and the finest ingredients—give you a loaf unsurpassed in wholesomeness and delicious flavor.

Fresh Fish from Vancouver every Thursday

Fresh Lamb—Chicken—Lard—Butter—Eggs

WORLD HAPPENINGS  
BRIEFLY TOLD

Thirty-five workers at Powell River, B.C., kept 14 trucks busy for one day and shipped a scowload of scrap to Vancouver.

A dozen mobile X-ray units, bought by school children and war workers, have been sent to the Russian fighting front.

An engine which once powered a yacht owned by the late King Alfonso of Spain was given to the scrap metal campaign.

The Miners' Welfare Association in Britain has inaugurated scholarships for young miners to help maintain their interest in their vital work. Nearly 1,000 civilians have been evacuated from the Aleutian islands west of Dutch Harbor and from Pribilof islands north of the Aleutians.

A solemn sacrificial ceremony was held in China to commemorate the 715th anniversary of the death of the great Mongol conqueror, Genghis Khan.

The flour supply to bakers in France is reported to have been cut by 40 per cent. although the quantity from which it was reduced already was insufficient.

Eugene Petrov, 40, one of the best known newspapermen and popular novelists of the Soviet Union, died while covering the siege of Sevastopol.

Sir Phene Neill, 61, lord mayor of London in 1930-31, is dead. Widely known for an aversion to oratory, he is said to have made the shortest lord mayor's speech in history in 15 words.

## Lack Of Courtesy

People Make Excuses By Blaming It On The War

A lot of people have lapsed into small lacks of courtesy and blaming it all on the war, says Adelaide Kerr, writing on Common Courtesy. Too lazy, with war work and problems, they say, to get this or that done.

Better check up on yourself and see whether the shoe fits you.

When did you last write your mother? (Your handwriting looks as good to her now as it ever did.) How many times have you been late to dates in the past month? There is an old axiom: The more you have to do the more you can get done. How about using some of the time you spend feeling sorry for yourself in getting things done.

## Tot's Airy Ensemble

BY ANNE ADAMS

All sugar 'n' spice is this Anne Adams twosome, Pattern 4022. The scalloped bodice buttoning matches the bonnet's trim. A collar or a lower neckline; puff or cap sleeves. Pattern 4022 is available in children's sizes 2, 4, 6, 8 and 10. Size 6, puff sleeve dress and bonnet, 2 1/2 yards 35 inch fabric; rare sleeve dress, 2 yards 35 inch fabric. Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man.

Branding license numbers on the walls of tires is a new method to foil thieves.

In parts of Europe, bread is made from chestnuts.

## German Brutality

Shocking Stories Come Out Of Norway And Poland

From two authoritative quarters come in one mail terrible stories of German brutality in the occupied countries of Europe.

The information office in Canada of the Royal Norwegian Government sends details of torture and mistreatment by the Germans in Norwegian prisons. This information, it is stated, comes "from persons who have been either eye-witnesses to the German misdeeds or have been in direct contact with those subjected to the cruelties and maltreatment." They were recorded outside Norway under the direction of a fully qualified judge, and the report was prepared officially for the Government of Norway in London. Case after case is recorded of Norwegian patriots beaten and pounded in prisons and concentration camps, of bones deliberately broken by Gestapo agents, of sadistic cruelties almost beyond belief if we did not know how completely all this fits into the picture of German conduct towards victims of their lust for conquest.

Even more shocking is the story of the concentration camp at Oswiecim, in Poland, told by a reputable informant who was in Poland last winter, and printed in the periodical Polish Fights, of New York. This torture camp for a time was commanded by the fighter and assassin, Schindler. The Gestapo guards are brutal and savage; prisoners whose only offence is their love of Poland are beaten to death, men are forced to bathe for long periods in the icy river in mid-winter, are denied medical service when they are ill, are lodged miserably in unheated barracks and must work 12 hours a day.

Such stories could be repeated interminably—and worse. With a degree of inhumanity matched only by the Japanese, German "culture" is spread in the occupied countries by the hangman, the firing squad, by paid torturers and brutalized guards. And this broad streak of savagery in the German character was as marked in the Great War as in this one, is not something that came with Nazis.—Ottawa Journal.

## Gertie The Goose

Canadian Corvette Has A Mascot That Brings Luck

"Goose, ahoy!" they shouted in the Canadian corvette Hespita, as Gertrude bobbed towards them warship. Gertrude acknowledged the greetings by coming alongside and allowing herself to be lifted aboard.

For a time she enjoyed the fuss those Canadian sailors made of her. But, like all visitors to warships, she soon fancied a tour of inspection. So away she waddled, leaving the sailors to decide what should be done with her.

"Roast goose is very tasty," suggested she. "Oh, no, let's keep her as a mascot," chorused others.

The vote favored the mascot idea. They called her "Donald" at first. But the egg she laid in the nest she built under the forward gun platform led to "Gertrude" being hastily substituted.

Now, as Gertrude the Goose that brought the Hespita nothing but luck, she shared the watches on the bridge, has a one-storey flat built of packing cases, and boasts her own deck water tank.

In port she has the freedom of the harbor—but she does not go far from the ship.—Vancouver Sun.

## Saving A Minute

Safety Wizard Has Figured Out What It Sometimes Costs

Minutes make hours, hours make days, days make years, and years make a lifetime. So we all try to have minutes. Some safety wizard has doped it out.

Take a man whose earning career has 25 years to go. That makes 13,140,000 minutes. (Figure it out, if you will. We did, allowing for six leap years.) We dash across the street against a light. If we win, we save a minute. If we lose, we donate up to 13 million minutes to death.

## Getting Acquainted

American Girl Reporter Pays A Visit To Canada

A girl reporter back from a bicycle vacation in Canada heard concern expressed in British Columbia about California's morale. "The Canadians shrugged at their own air raid perils, but were disturbed lest we crack under the strain of the blackouts, and the hysteria they evidently expect here if the blow falls. And she encountered a misapprehension of American war effort and production surprising in the light of her own information.

From this it seems evident that our neighbors to the north need some information about us and our frame of mind, as we some time ago urged we should have more official news about Canada's tremendous war effort and courageous spirit.

A difficulty is that the typical is not news. We report highway casualties, not how many get home safely. In the United States and Canada are fine, decent men in public life, and cheap skates, peanut politicians, headline grabbers, renegades. Our neighbors hear us moaning Congress for the members that disgrace it and forget, as we often seem to do, that if there were not sincere patriotic, hard-working men on the job, the racials would have had us on the rocks long ago.

The "news" that we exchange is extraordinary, not the typical, but it is what we judge each other by. We must find a way to let our Canadian Allies know that in California, as in British Columbia, we are not hankering for an air raid, but if it comes, we can take it.—San Francisco Chronicle.

## SUNDAY SCHOOL LESSON

JULY 19

CAIN AND ABEL: A CONTRAST

Golden text: By faith Abel offered unto God a more excellent sacrifice than Cain, through which he had witness borne to him that he was righteous. Hebrews 11:4. Lesson: Genesis 4. Devotional reading: Psalm 51:10-17.

Explanations and Comments The Two Sacrificial Offerings, Genesis 4:1-5. To Adam and Eve two sons were born, Cain and Abel. The Hebrew word for "I have gotten," verse 1, is "Kaneh" whence our word "Cain." Cain became a tiller of the ground, a farmer, and Abel a keeper of sheep, a shepherd. After a time both brothers brought the fruit of their labor as offerings to Jehovah. Cain's offering was the fruit of the ground; Abel's, the firstborn of his flock, the greatly-prized fat pieces of which were offered in sacrifice. Compare Lev. 1:8; 3:3. "The origin of sacrifice is not explained, nor is an altar mentioned. Man is assumed to be by nature endowed with religious instincts and capable of holding communion with God. Worship was man's mode of approach to the Deity, and sacrifice was its outward expression" (Herbert R. Ryle).

Jehovah approved Abel's offering, but not Cain's. Why this was so, and how approval was shown, the story does not say, but Cain's anger (verse 6) and his lie and insolence (verse 9) show that there was trouble in Cain himself. The value of the offering depended upon the offerer. Read Luke 21:1-4. Such a man as Cain proved himself to be could not be pleasing to Jehovah.

The Warning to Cain, Genesis 5:6, 7. Cain could not endure to have his brother preferred before him, and became angry and sullen. With "this countenance fell" compare our word "chagrin." Cain was questioned by Jehovah as to the cause of his anger and sullenness. The questions were designed to teach Cain that the way to make things right was not to be jealous of Abel but to make sure that he himself was right toward God; they should have led to such severe self-examination as would have arrested his evil thoughts and prevented the commission of his crime. "If thou doest well, shall not thy countenance be lifted up?—be bright and open, not sullen? 'If thou doest not well, sin croucheth at the door.' Sin is here pictured as a wild beast lying at the door of a room, ready to spring upon the one who gives it entrance. 'Unto thee shall be its desire,' sin is eager to make the spring; 'do thou rule over it,' do thou conquer the temptation to sin. The psychological truth that there is great danger in harboring resentment in the heart is finely pictured here.

## LOSS OF TIME THROUGH ILLNESS

Sickness is the arch-saboteur of wartime production, causing in the United States alone annual loss of working time sufficient to build two heavy cruisers or 448 bombers or 3,300 light tanks. According to a comparative Canadian report, soon to be made public by the Industrial Division of the Health League of Canada, absence of a national public health program is causing an annual loss of fifty million dollars to wage earners. In terms of production, this loss amounts to one-and-a-half times the wage loss figure or, seventy-five million dollars. A recent Gallup poll showed that in a single month time stolen by illness among Canadian wage earners could have built 377 cruiser tanks or 370 medium bombers. In the present crisis, observers say, continuance of such time-production losses is suicidal.

Dr. Grant Cunningham, Director of the Industrial Hygiene Division of the Ontario Department of Health, states that sickness is the main cause of lost time from work, ten times as great as losses caused by industrial accidents. Hon. Ian MacKenzie, Minister of Pensions and National Health, declares that fifty thousand Canadian workers are absent every day.

At least 50% of this costly loss can be prevented by adequate sickness prevention programs in industrial establishments. In such measures have halved the average of nine and half days lost per year per worker. With a national health program giving homes as well as factories adequate protective measures, the loss could be further reduced. In addition to the net saving in time, protecting the health of workers directly improves labour relations. General improvement in the workers' health makes for a marked speed up in production besides effecting substantial reductions in accidents and occupational disease, absenteeism (defined as absence from work because of fatigue or minor illness) maintained by fatigue and malnutrition—a factor which for a time seriously impeded production in British war industries) labour turnover, and insurance costs.

The highest skyline automobile road in the entire world is in the Rocky Mountain National Park.

When high in the sky, the moon will appear larger if you lie flat on your back to look at it.

The floor area of the capitol at Washington is 14 acres.

Australia's wool clip is about 1,000,000,000 pounds a year.

CHAPTER XXXX.

From her chair in the cabin, Tamar could see the greeting between Therese and Louis. The big man got out of the cockpit of the plane, dressed in aviator's uniform. Therese threw herself into his arms and Tamar knew that she was crying. Shock touched her fleetingly. Yesterday she would never have dreamed that Therese was the clinging-vine type.

Louise swept her to him and strode towards the cabin. He must be a queer mixture to love Therese so, and be able to harden himself for the kind of crime he had just committed. Tamar heard the door open and his voice: "Got some steaks for Louise, Syvette? I'm famished."

Therese closed the kitchen door and they continued to talk in low tones. Presently Louise came into the main room and looked at Tamar. "These keep you company, Babe?"

"Very good company," Tamar said obligingly. In the same tone that she might have continued the conversation by saying: And you? Did you have a good trip? She saw the look of a sleepless night about his eyes, and the strain of worry about his lightened lips.

"Arrangements are made. I'll get you back home before much longer. But I've got to get some sleep to-night. If you can stand our hospitality one more night, I'll see that you sleep tomorrow night at Shadwell. O.K. by you?"

Tamar tried to smile. "And if I should say no, would it make any difference?"

"Sorry. It would not."

"Then it's O.K. by me," Tamar said. She bit her lip to keep from asking if he had seen her father or had any message from him. How would Louise get her back to Shadwell without being interested? Would they fly again, or would he take the risk?

During the afternoon a light snow fell and the wind howled down the big chimney. It grew dark early, and Therese and Louise played a game of housewren bridge. Tamar tried to read, but the words blurred and the

Mississauga, Ont., Canada

pages had a way of not getting themselves turned.

She hungered for Shadwell and all that it meant to her. She had thought upon her mother's death that it would never be the same again, but knew now that Shadwell was part of her and that she would never want to exist without it.

But somehow since the Cricket Hill had been opened and the mining operations begun, Shadwell had been different.

She could not analyze it just yet. There was confusion in her thoughts when she remembered the strong features of Christopher Sande. Her heart had never believed right since his first appearance, and she had known when he spent the week there that most of her thoughts kept returning to him.

"You poor darling!" crooned Therese's voice suddenly. "You're tormenting yourself with these cards. Off to bed with you!"

Tonight Tamar slept with her hands free, but the furniture was changed about in the main room as on that first night. Louise could still take no chances about her escapings. Tamar did not sleep at all. She was afraid that some time during the negotiations of exchanging her for the ransom, that Harry or her father or some of the State police would try to capture the abductor. And she knew that Louise had no qualms about using the gun he kept in his pocket.

The sun was slow about rising, but finally appeared over the hills and sent a warm glow across, melting the rest of the light snow. Louise prepared to take off in the plane about 7:30.

As he went out of the door he asked back briefly and said grimly: "If your father has played square with me, all's well. But by heaven! If he hasn't you'll never see him again."

Therese came back after the plane had taxied down the makeshift runway and taken off into the wind. "We'll get pretty soon now."

Therese dressed in a warm woolen slacks suit and gave one to Tamar. "Here, this will be better for you. Wish you could keep it as a memento of our visit. Red, size 14. Just right, and very becoming to your coloring." She rummaged in another closet in a corner of the main room and pulled out a short fur jacket. "This will help until we get out of the hills."

Just before they left the cabin, Therese blindfolded Tamar. Much as she hated to submit to it, Tamar knew that not only her own safety lay in carrying out their plans, but perhaps the lives of some one back home depended upon it.

The leather of the car seat was cold and Tamar shivered. She had not even seen the road upon which Therese had entered the valley but realized that it must be a winding one and that its entrance was concealed by the cabin.

They seemed to be climbing at first. And then they dropped down rapidly and Tamar knew that Therese must be an expert driver. She could feel the sun against her face through the glass in the window. Therese drove silently.

Tamar could not tell anything about the directions. Once they seemed to be going East, but afterwards they turned and curved in so many different ways that she had no idea where they were heading. They did not stop for perhaps an hour, and Tamar could tell that most of the time on the straight road that they were driving at least 70.

The car slowed and Therese leaned over and said: "I'm taking off your blindfold while I get gas. But don't

you try anything, or it will be just too bad."

Tamar said: "I won't try anything. My life isn't so important but I don't want anything to happen to any one at home."

"That's smart. Because I'm to visit Louise how you behaved."

At a little inn a half hour later, the blindfold was removed once more and Therese waited while an attendant brought her a long envelope. It contained something more than the yellow telegram. Therese read it quickly and wrote a note to be sent.

"The address is on it," she said.

Tamar could see the license of passing cars indicated that they must be in Georgia. Just where she could not tell. The sign said Toll Bridge Inn. She printed the address on the place on her mind. But, of course, she realized that a telegram could be sent there without being extraordinary.

"They were off again, Therese said: 'I'll give you instructions, and believe me, you'd better follow them to the letter.'"

There was a new note in her voice once more. It was a mixture of the old brandy and although it seemed pierced with nervous tension, Tamar knew that she had received good news from Louise. She wondered what else had been in the envelope.

"Take off the scarf and put on the dark glasses from the glove compartment," Therese said.

Tamar tumbled with the knot and slid the scarf down. Then she gave a swift look about the highway, before she opened the compartment. The dark glasses were almost as bad as the scarf, she thought, wondering why Therese had not had her use them all along.

Tamar heard the roar of a big-motored transport high above them and dimly she saw through the glasses they were approaching a small town. Then traffic grew thicker and Therese wove expertly in and out of it.

Presently the car stopped and Therese said: "You're going to get on that transport. Here's your reservation. You'll get off at Atlanta. It will be known that you will arrive by plane, so there will be no delay." She took the reservation out of the envelope and handed it to Tamar.

"No one is to know who you are, remember."

"But won't I look just a little odd getting on a transport in this costume?"

"No," Therese laughed shrilly. "No, they'll think you're Greta Garbo. Only I prepared for that. You'll change your jacket and slip into this skirt and leave the slacks right here. We'll get there just in time for you to get on the plane before they take off."

Tamar looked about her, seeing only dimly that they were in a secluded spot. Otherwise, it might have been easy enough for her to call to some one for help and complicate things for Therese.

Tamar knew that Louise was waiting until after the plane left before he gave the word. They had gone to a lot to make her imprudent comfortable and it seemed strange they would go to so much trouble. Was Therese lying to her about it being known that she would arrive in Atlanta by plane?

Tamar was dressed in a navy blue suit now, and noted how nearly perfect it fit. At the last moment, Therese provided her with a matching jersey turban, purse and cosmetics. "But keep on the glasses, my dear," she commanded her.

They were soon getting into traffic once more, but were outside the city. Tamar, not knowing how long it would take to reach Atlanta, could not think where they were but she saw a blurred sign on one of the hangars.

Tamar was trembling. She wanted desperately to slip the glasses down and look at the sign, but knew that she would be able to see it later, anyway. Furthermore, Louise would not give the word at home that she was on the plane until it had left the field, and he would not have that word unless Therese wired him again. Therese was only one thing she could do, and that—obey.

"We'll go directly to the gate. And not into the terminal building at all. You march straight up to the hostess and give her your reservation."

Tamar walked to the gate. As she passed through, she saw a tall figure, that even through the dark glasses she knew must be Ranny. (To Be Continued)

It has been estimated that babies now eat about four times as much as their parents did when infants.

The deepest oil well in the world extends less than three miles downward.

**Youngest Nazi Marshal**

**Rommel Has Been Favorite Of Hitler For Many Years**

At 50, Rommel is the youngest marshal in the German army. He is a rarity in the German officer class, for he has no "von" prefix to his name; he does not come from the Prussian military class and does not follow its code of behavior, such as the "Honor" and "Duty" of a "yes-man." The son of a Bavarian workman, he had joined the Hitler faction in 1923 and took a leading part in the numerous street brawls and gang warfare by which the Nazis were able to intimidate the German populace and batter their way to power. In those early days Rommel achieved a notable record for maiming, murdering and pushing people around. His thugs were particularly successful in terrorizing the town of Coburg, and for this he earned Hitler's special gratitude, for it is this raid which Hitler in "Mein Kampf" credited with bringing about a turning point in his career. When Hitler came to power, Rommel should be leader of the S.S. black guard, Hitler's own private army which guarded his person and attended to his private feuds. It is said that he is to lead the S.S. in Hitler's favorite—Toronto Star.

**Home Canning**

**Full Information Can Be Obtained From Government Bulletin**

Successful home canning depends on destroying all bacteria, yeasts, and moulds, and sealing the product in air tight containers, so that no contamination can take place to cause spoilage. At the same time the natural color and flavor should be preserved. How this can be done is explained in the revised household bulletin, No. 8, "Canning Fruits and Vegetables."

Full information is given on checking equipment, washing and sterilization of jars, testing jar rings, selection of product, grading or sorting product, washing and peeling, blanching when required, preparation of syrups, packing jars, processing or sterilizing, sealing, cooling, and storing, together with a time table for cooking and canning the various fruits, and a time table for vegetables. Special recipes are also given for such things as jam, marmalade, and soups.

The bulletin may be obtained free by writing to the Publicity and Extension Division, Dominion Department of Agriculture, Ottawa.

**SELECTED RECIPES**

A change in bread does magic tricks with sandwiches. If the bread is homemade, butter alone is almost enough filling. Here is a recipe for an unusual tea bread made with corn flakes: Spread with cream cheese, it makes a supper, super sandwich.

**Corn Flake Tea Bread**

2 cups corn flakes  
1 cup milk  
1 cup compressed yeast  
1 tablespoon sugar  
1 teaspoon salt

1 1/2 tablespoons molasses  
2 1/2 cups (about) flour

Roll corn flakes into very fine crumbs. Crumbs yeast into a bowl. Scald milk and cool to lukewarm temperature; add to yeast, stirring until yeast is dissolved. Add sugar, salt, shortening and half the flour; beat until smooth. Combine corn flakes with remaining flour and add to dough, mixing well. Turn onto floured board and knead until smooth. Place dough in greased bowl, brush with melted fat, cover, set in a warm place and let rise until it has doubled in bulk. Punch down and shape into loaf. Place in greased loaf pan and brush with melted fat. Bake in moderately hot oven (425 degrees F.) 15 minutes; reduce heat to 375 degrees F. and bake about 45 minutes longer.

Yield: One loaf (4 1/2 x 8-inch pan).

**Peanut Butter Squares**

1/2 cup butter or margarine  
1/2 pound marshmallows (about 2 1/2 dozen)  
1/2 cup peanut butter  
1 package oven-popped rice cereal

Cook butter and marshmallows in double boiler. Add peanut butter; stir thoroughly to blend. Put oven-popped rice cereal in large buttered bowl and pour on marshmallow mixture. Press into a 9 x 13-inch shallow buttered pan. Cut into squares when cool.

Yield: 32 squares (two 8 x 8-inch pans).

**STOP IT! ITCH OF INSECT BITES—Itch Rash**

For quick relief from itching of insect bites, heat rash, skin irritation, sun-burn, itching, eczema, etc., use this ointment. It is made from the most effective ingredients and is completely safe. It is sold in 10c and 25c packages. For full directions, see box. For a free trial, send 10c to D. D. Prescription, New York, N. Y.

**His Only Yardstick**

**Hitler Evidently Measures Other Peoples' Intelligence By His Own**

Hitler calls the Germans the master race, and yet, says The Argonaut, it is pointed out that he has never spoken one word of praise for a great German writer, or a great German philosopher, or a great German educator, or a great German critic, or a great German theologian. We have no doubt that Hitler thinks that when he dies, all wisdom and knowledge will die with him. But it would not be surprising if he had come to regard himself as an earthly immortal.

**Antidotes For Gloom**

**Anyone Who Feels Depressed About War Can Get Busy**

Those who are depressed by the initial success of the Japanese in the Far East should remember that Italy also had a run of luck after first entering the war. Today the Italians are under double defeat, having been driven from all their conquests and are being slaughtered by the Huns. Anyone who is not cheered by that thought, should buy war savings certificates, subscribe to the Bomb Victims' Fund, work for the Red Cross, or enlist in the Forces.

**SMILE AWHILE**

**Lady of the House—I Don't need none of 'em.**

Salesman—How do you know I might be selling grammars.

Waiter—The gentleman sitting over there says his soup isn't fit for a pig.

Manager—Then take it away and bring him some that is.

Barber—Why you have anything on the face when I've finished shaving, sir?

Customer—It doesn't seem likely.

Son—I thought I asked you not to tell mother what time I got in last night. Mandy.

Cook—I didn't, Massa Jim. Ah, he said that Ah was too busy gittin' breakfast to notice the clock.

Lawyer: "That will be six-and-eight-pence, please."

Client: "What for?"

"My advice."

"But I'm not taking it."

Customer—But I can't pay you for this suit for three months.

Tailor—Oh, that's all right. Don't worry about that.

Customer—Well, thanks. When will it be ready?

Tailor—in about three months.

Miss Bride (loftily)—Oh, I didn't accept Arthur the first time he proposed.

Miss Rival—No, dear, you weren't there.

He takes nationing so seriously that instead of calling his wife "Sugar," he now calls her "Honey."

Duane—Back from your vacation, eh? Feet any changed?

Bruce (hand in pocket)—Not a cent.

Teacher—Why were you late to school this morning, Henry?

Henry—Because the bell rang before I got here.

Delightful desserts can still be served to the family—rich, nourishing, custards, and blanc manges made easily and at little cost with Canada Corn Starch.

Use Crown Brand Syrup to save sugar: It's delicious as a sauce on desserts, on pancakes or with cereals, and is a wonderful sweetener for use in cooking and baking.

**SMART COSTUME JEWELRY YOU CAN MAKE YOURSELF**

**STRING ON WIRE**

**FASTEN TO HINGE**

Clip From Pearl Buttons

Amazing what smart costume jewelry you can make yourself! This lovely Grapes of Pearl clip coats little, or nearly put together, and how smart it looks on party dresses and day clothes, too.

You need only an ordinary brass hinge, annealed wire and 13 pearl ball buttons—6 of them about 1/4 inch in diameter and 7 of a larger size.

First double a 14-inch length of wire, slip a small button down to the fold, and twist wires 3 times. Now add to each wire a small button, loop the wire back through each eyelet and secure the cluster of 3 by twisting the wires 3 times.

In much the same way, you add the other 3 small buttons, then the 7 large ones.

To fasten the pearls to the hinge, insert wires through holes, twist tightly at the back.

Other jewelry you make as easily sometimes using things on your pantry shelf. From macaroni—a sea shell necklace; from chick peas—a "gold" bracelet.

Complete directions for these and other smart pieces of costume jewelry are given in our 32-page booklet. Tells how to make bracelets, belts, necklaces, boutermines from inexpensive materials for all kinds of costumes.

Send 15c in coins for your copy of "Costume Jewelry You Can Easily Make" to Home Service Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man. Be sure to write plainly your name, address, and the name of booklet.

## PRESSING FOR OLD AGE PENSION INCREASE

Four members of the Alberta legislature—two opposition and two government members—told old age pensioners in Edmonton this week that they were wise to organize and press for more adequate pensions. Representing the government were Hon. N. E. Tanner and N. B. James, M.L.A., with J. Percy Page speaking for the Independents and Hugh J. MacDonald, K.C., representing the Liberal group. Mr. Tanner declared that the pensions problem will be settled adequately only when the government has power to issue, create and control the distribution of currency and credit. The recent \$5-a-month increase was a step in the right direction, but was not enough. Mr. James urged pensioners to keep up pressure until they obtained \$50 a month for all more than 50 years of age.

## GUARD CHILDREN AT STREET PLAY

Now that thousands of school children are home from school for the summer holidays, motorists are being urged to use every care to prevent accidents.

Officials of the Alberta Motor Association have drawn attention to the danger when children are allowed to play on the streets or highways, without proper supervision.

Some weeks ago, police found that a two-year-old child had been fatally injured, without the car driver having any knowledge of the accident. Evidently the car had been started up and driven away, without there being any indication that a youngster was playing under it.

Children play on the streets or roadways, eagerly using these clear spaces for their sports or games. They are unaware in many cases of the need of keeping a sharp lookout for motor traffic.

Each summer season, a number of deaths are caused through youngsters running out from behind standing cars. In some cases, they suffer severe injuries.

A.M.A. officials urge parents or guardians to warn children to watch for oncoming traffic.

Motorists, most certainly those who drive safely and observe traffic laws, strive to avoid accidents, but there is a duty on parents or guardians to impress upon the children the dangers of playing or running across traffic routes, regardless of the dangers that lurk there. Co-operation on the part of all will serve to avert the injury and possible death of Alberta children when at play.

Ten thousand tons of steel—enough to build three ships—were lost because of a two-day strike by C.I.O. union steel workers at the Bethlehem Steel Company's Lakswanna, New York, plant recently. It doesn't matter who was in the right about the workers' grievances, government machinery is provided for adjudicating such disputes. The point is that the men walked out—and steel for ships urgently needed to replace those being sunk daily by enemy submarines failed to come from the mills.—Christian Science Monitor.

## THE LAST WEAPON

Used by the National Committee as an answer to the Austrian peace overture in 1917.

(By Louis K. Anspacher)

They have invoked the sword, so by the sword

Let them abide.

They have appealed to might, and so by might

Let them be tried.

They have sworn all peace, so talk of peace

Be now denied.

After the use they've made Of every ruse,

And every vow betrayed

Into abuse:

Behind a flag of truce

Let them not hide!

We see the ambuscade:

Old weapons fall;

Traps of fair words are laid;

Appeasers quail;

Dupes are dismayed;

Coward hearts fail.

And pity is prayed.

Let us beware the snare:

Fight to the end!

Let us not cease to fight!

There is no peace in sight

Until they bend

Into the dust!

Upon the other side

Of the Rhine we'll sign

Peace when they must.

After the wrong they've done

All in the name of the Hun—

Murdered and lied!

They don't belong among

Those whom we trust.

Let us disarm the foe:

That is the debt we owe

To those who died.

Mr. Anspacher, distinguished American poet, wrote the verses above 25 years ago. The original title of the poem has been retained, although Mr. Anspacher suggests that a 1942 title might appropriately be: "Have They Changed?"

To owners of rifles, the following sure way of removing nickel from the "lands" may be of value. Endless scrubbing can be avoided if this removing solution is used occasionally. This amount is sufficient to clean the barrel about six times: 1 ounce ammonium persulphate, 200 grains ammonium carbonate, 6 fluid ounces ammonium hydroxide and 4 fluid ounces of distilled water.

Lieut. William A. Kardash, member of the Manitoba legislature, has written a well-documented pamphlet dealing with the activities of the Ukrainian Fascist leaders amongst the Canadians of Ukrainian origin. The pamphlet contains a short history of the Ukrainian National Federation, and exposes its connections with a similar Nazi-sponsored organization in Europe, proving conclusively the Nazi orientations and sympathy of this group. A copy of the pamphlet has been received by The Enterprise, entitled "Hitler's Agents in Canada." It reveals a story of potentially dangerous fifth column activities in Canada among Ukrainian Canadians.

## THE PASS EIGHTEEN YEARS AGO

(The Blairmore Enterprise, 1924).

March 27.—Bellevue's senior hockey team was victorious in the Allen cup playoffs by the Selkirk at Winnipeg. Bellevue put up an excellent showing.

Leslie, 19-year-old son of Mr. and Mrs. J. A. Packer, came near losing his life at the Blairmore Iron Works last week when he fell onto a piece of moving machinery which threw him still further to another part. He was unconscious when picked up and was rushed to the local hospital for treatment. For a few days no hope for his recovery was entertained, but he was now showing good signs of recovery.

A petition signed by L. Denatour, W. A. Beebe, A. E. Ferguson and S. Derenzo, asking for extension of concrete sidewalk along block 7 was being considered by the town council.

Dick Alexander, of Cowley, had just gone on a rampage of winning prizes at whist drives. He is so severe that a straightjacket was being built for him. Mrs. Harry Hannan, Mrs. P. McKee and Jimmy Leigh were on the refreshment committee on Friday last, which accounted for Dick being able to study his game more.

A Blairmore woman started her husband was now wearing a moustache, and in order to get toughened she had started kissing a scrub brush.

The government was reported to have gone the limit in placing a ban on the killing of skunks, while the country was about overrun by creatures known as skunks, and other creatures were longing for the privilege of putting them where they ought to be.

Principal F. Stacey McCall, of Alberta College, Edmonton, was a guest this week of Mr. and Mrs. George Pattinson at Coleman.

Constable Thomas Duncan was being transferred from Cranbrook to Mission, B.C.

A Ford car belonging to Thomas Gushul, photographer, standing near the Bellevue arena, on Tuesday night, was carried by a gust of wind a distance of about 200 feet and beret of its top. A parcel of photographs measuring about two feet square, and weighing twelve to fifteen pounds, was blown from the car over the hill to the C.P.R. tracks, a distance of several hundred yards.

J. E. Upton is employed at Macleod, cleaning, pressing and tailoring.

Creston raspberries, excellent, are on the market in Blairmore this week.

We thank Bill Duncan for an empty basketful of fish received on Wednesday evening.

Customer: "Have you a book called 'Man, the Master of Women'?"

Sales Girl: "The fiction department is on the next aisle."

Repair man, phoning: "Your doctor's out here with a flat tire."

Reply: "Diagnose the case as flatulency of the perimeter and charge him accordingly. That's the way he does."

Neighbor: "You seem to be able to find everything. What's your system?"

Housewife: "Well, I always feel that you can find whatever you want when you don't want it by looking where it wouldn't be if you did want it."

An Irish piper, who lives in Coleman, and who now and then indulges in a glass too much, was accosted by a gentleman with: "Pat, what makes your face so red?"

"Please, yer honor," said Pat, "I always blush when I spakes to a gentleman."

"The whole thing about me," the bore boasted, "is that I'm a born enthusiast. It doesn't matter what I undertake, I just have to do it thoroughly. I simply throw myself into everything I do."

"Then, I wish you'd undertake to dig a nice deep hole somewhere," the listener mumbled.

A prominent Alberta M.L.A. recently declared: "You have no idea how the premier treats us in the caucus. He scolds us as though we were school children, orders us about and storms at us if we do not agree with him."

It's nice to be in or on top of a canoe, but recently W. A. Vaughn, former resident of Blairmore, now of Wolfville, N.S., had the experience of being underneath a canoe when the durned thing upset. The Nova Scotia government threatened to bill him 50 cents for that bath, but saw no way to collect, as modern equipment such as soap, towels, etc., were not available to him.

Hearty congratulations to Erwin Mackrodt, the bus conductor, who won a recent Keep Smiling courtesy contest in Berlin, Germany. Mackrodt, a hardy man is he, to find anything to smile about in Hitlerland. A veritable Pollyanna, forsooth, and we'll wager a pure Nordic. We hope that the radio he won is not of the short-wave variety. If it is, and he should tune in on international wave lengths, we doubt that even the thousand marks (paper) and 20 theatre tickets he received will be sufficient to keep smiles on his Aryan face. — New Glasgow Free Lance.

The Defence of Canada Regulations Committee have decided that American originated Technocracy, Inc., is an illegal organization in wartime.

Income tax payers do not have to file their next returns as of 1942, it was announced at Ottawa on Friday last. Deductions from employees begin in September of this year, however, and continue until August 31, 1943, covering the tax on 1942 income at the increased tax rates provided by the new budget. In previous years the taxpayer had to have his return in, with at least part payment of taxes, on April 30.

The Standard hasn't told you, but you will be glad to know that the genial reporter, Malfred Grimes, is well again and back on the job, the girl who always gave you the cheerio-good-bye at the station. When we hear her asking with tact and honest interest: What's your name, where are you going, are you on leave, etc., we often wish for the sake of you lads that the government would engage her to teach the M.P.'s her technique. It would be a change from, "Say, guy, where's your pass? Make it snappy." —Shaunavon Standard correspondent, Saskatchewan.

The Americans celebrated July 4th by sinking at least three Japanese warships. These cockeyed ships, like the Japs themselves, are liable to be still going in any direction. Japs have not yet begun to realize that their eyes and ideas are purely cockeyed.

**E IS FOR ELAND**

The Eland is the largest of the South African antelopes. The males sometimes stand six feet in height and weigh over 1500 pounds.

## Co-Operation For Victory

EVENTS OF THE PAST three years have taught an unforgettable lesson in the value of collective security. Familiar to us all, is the tragic story of the fall, one by one, of the small nations of the Old World. It is now clear that the story might have been different had they foreseen their danger and presented a united front before the onslaught of the common enemy. It is gratifying to see that those nations still free of the Axis "who have learned the lesson and that they are working closely together in the prosecution of the war. Canada is co-operating fully with the other nations. Between the United States and Canada there has grown up a degree of co-operation in production and defense which sets a fine example in the breaking down of barriers between friendly nations in these critical times.

### Joint War Production

Through the Joint War Production Committee, Canada and the United States have co-ordinated their productive capacity in order to bring their maximum output of war materials to the peak as soon as possible. How full their co-operation in these matters is, is illustrated by the fact that all priority orders issued in the United States, apply automatically in Canada, and thus the war industries of both countries share equally in this important factor of production. The Joint Production Board, recently set up by Britain and the United States, was formed on the pattern of the agreement which exists between Canada and the United States.

### Resources Of Two Nations

Edward A. Locke, assistant to Donald Nelson, chairman of the American War Production Board, visited Canada recently, and he gave some interesting facts concerning the joint effort being made in his country and Canada. Of our co-ordinated war effort, he said: "Our two countries have given a striking example of the way in which the resources of two great nations can be tied together to provide the strength of a united effort. It was a natural development; threatened by a common danger, we united in a common action to meet it. Out of our experience has come a new plan of collaboration into which all free nations can fit." Not only in production but in defense, have the two nations joined and our coast lines and outposts are being guarded by a joint plan of protection. It is clear that if peace is to be maintained in the years following the war, it will be through a plan based on the principle of collective security. Many barriers which have existed between nations will have to be removed and the example set by the people on this continent may help to make the pattern for that new world order.

### Anonymous Heroes

#### Two Soldiers Deprived Noses Of Valuable Supplies At Tobruk

British army and navy men who escaped from Tobruk aboard the South African minesweeper Parktown said two anonymous heroes deprived the Germans of valuable supplies by blowing up the docks and themselves.

From far out in Tobruk Harbor, they saw the pair standing on the opposite end of the docks loaded with munitions and oil. They thought they pushed down plungers setting off five tons of explosives under the wharves. "There was a blinding flash, the loudest roar I ever heard, and everything around the harbor went up in bits, including the two boys," one soldier said.

He added that the concussion rocked the ship and must have leveled what was left of the town.

The shorthand system of writing has been traced back to the year 63 B.C.

Sixteen thousand horses died of influenza in New York City in 1872.

### Higher Milk Production

#### Will Depend Mainly On Good Hay Crop This Year

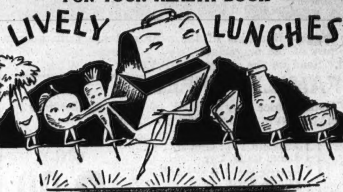

To get five per cent. increase in milk production which Canada needs this year, an extra good crop of hay will be needed. A rule of thumb by which to gauge how much should be on hand is: 2½ tons of legume hay for each cow in the herd next winter, 1½ for each yearling, ¾ ton for each calf 6-12 months old, and ¾ ton for each calf under six months.

### Another Problem

#### Razor Blades Can Be Reconditioned But What Happens Then

Wartime shortage of steel has partly solved the peacetime puzzle of what happens to old razor blades. The answer—at the moment—is simple. They become "razor blades." Firms are buying thousands, at 25 to 50 cents a pound, from hotels and restaurants. They are reconditioned and resold. But there's another problem now. What happens to the twice-used blades?

### FOR YOUR HEALTH BOOK

A medical yarn, probably apocryphal, tells of a group of loafers in the far East whose slothfulness was such that they didn't even trouble to wash their rice. Across the way a group of highly refined women lived in daily disapproval of the neighbours who weren't fussy about their food. These women ate nothing but the most highly polished rice. Unhappily all the women came down with beri-beri while the loafers grew fatter and fatter. This led an inquiring scientist to the discovery that essential vitamins are carried in the outer shells of grains and cereals.

In the western world the problem has been somewhat the same. Nowadays people who wish to be healthy in the face of rising prices and higher taxes, are returning to simpler foods whose vitamin potencies have not been destroyed by excessive refinement. Because of impending shortages in other foods, Hon. J. G. Taggart, food administrator under the War Time Prices and Trade Board has urged Canadians to eat more bread. If we are to do so we should make sure it is bread rich in vitamins. Such is real whole wheat bread.

Adult daily requirement of Thiamin or Vitamin B<sub>1</sub> is placed at at least 500 international units. Generous use of real whole wheat bread helps secure this essential, as it is the richest bread source of B<sub>1</sub>. A single slice of it yields 30 international units while a slice of refined white bread yields only one sixth the vitamin potency—5 international units. Other varieties of bread, shown in a comparative table calculated by Dr. E. W. McHenry, chairman of the nutrition division of the Health League, show vitamin content in order of importance:

McHenry Memorandum concerning different types of bread with special reference to Thiamin content:

International Units of Thiamin (B<sub>1</sub>) in breads

|                            | 1 slice | 1½ lb. loaf | 1 lb. loaf |
|----------------------------|---------|-------------|------------|
| Refined White              | 5       | 150         | 200        |
| Canada Approved White      | 15      | 250-350     | 280        |

### Disease Carriers

#### The Only Good Fly Is Most Certainly A Dead Fly

This has been said, at times, of other pests but never with more truth. Flies are the scavengers of the world. Right now, on many war fronts, as carriers of disease and death, they constitute a major problem facing the military medical authorities.

And here, on the home front, notwithstanding the warnings of health experts, medical men and scientists, there will again be too little attention paid to the problem of guarding against the fly menace.

Do you realize that every manure pile, every exposed garbage tin, every refuse heap on which flies delight to browse around, is a potential source of fatal contamination? Do you know that the bacteria on one small fly's body may number 5,000,000, that flies are, possibly, the most prolific breeders in the insect kingdom, that their favorite habitat is the place where most filth abounds and that, if the opportunity comes their way, they will carry disease-breeding germs into home and store and deposit them on food, drink and human beings? In febrile paralysis, diarrhoea, typhoid are a few of the menaces that may come in the wake of open and unscreened windows or doors.

One way to eliminate the fly menace and a safe, sure, clean way is to place Wilson's Fly Pads here and there in convenient places. They'll kill all the flies and, incidentally, they're most efficacious ant-killers, too. So, don't only protect your home by trying to keep them out. Make doubly sure by deciding to wipe them out!

### Would Puzzle Nazis

#### Nice Thing About Democracy Is Willingness To Correct Errors

One nice thing about living in a Democracy is that if it does make a political mistake concerning you, personally, it may be corrected. It isn't generally known, perhaps, but about 500 of the enemy aliens Britain sent to Canada for internment have been returned to England as free men. The original evidence against them, on review, failed to carry weight. Considering all the trouble involved in getting at the facts and then transporting the group across the Atlantic (where ship tonnage is at a premium), this procedure is unquestionably beyond any Nazi's ability to comprehend.—Detroit Free Press.

The colors on the wings of butterflies are the result of the arrangement of innumerable and minute scales.

## The Individual Citizen's Army

A Weekly Column About This And That In Our Canadian Army.

By Alan Maurice Irwin

When I came home from the last war I heard a lot of grumbling about some fellows who had spent the war years working in munitions plants. It wasn't the soldiers who complained—they simply said: "Lucky stiff, that's what I would have done if I had had any sense!"—It was the older civilians. They seemed to feel that it was wrong for some people to have earned "high wages" while others did the fighting. Just who should fight and who should stay home is a hard problem—and one that is really solved only by those who volunteer.

No columnist is in a position to make a forthright statement on the subject because he cannot know all the circumstances that lead to an individual's decision. Neither, I suspect, can anyone else be arbitrary on the subject.

But we can all wonder. And this is the sort of thing that makes us wonder. A few days ago Paul V. McNutt, federal security administrator in the United States, said to an audience at a meeting of the American Medical Association that the United States needs 3,000 doctors every month for the Army and Navy.

He said: "There is an apparent lack of interest on the part of your profession to volunteer because of reluctance to give up private income for army pay."

That was a strong statement, but McNutt is not noted for withholding his punches.

We civilians don't need doctors as badly as will the soldiers when the big battles get under way. For a tummy-ache or a broken leg we can wait a few minutes or hours if the civilian doctors have to spread their talents over more of us. But a shell-torn soldier can't wait. If there should not be enough doctors in the army to give prompt attention to the wounded men because too many stayed home to look after us it would be a tragedy.

Perhaps we ask too much of our medical men. We take it for granted that they will come at whatever hour of the day or night we call; we take it for granted that they will come whether we have a record of paying our bills or not; and we also take it for granted that they will give quite a bit of their time to free clinics.

The Army needs doctors. So does the Air Force. This year quite a number of young men finished training and new shingles will be cropping up all over the Dominion. Let's hope that a good percentage of these shingles will take the form of a dose on the shoulders or rings around the cuffs—I'd hate to think of a Canadian public man making a speech like that of Paul McNutt.

It all gives one very furiously to think.

What are we doing to help along the successful prosecution of the war?

Are we feeling that because there is nothing spectacular we can do that the little things are not worth while? We do, sometimes, and it's too bad.

That old saying, "Mony a mickle makes a muckle," was never more true than when applied to the work of the individual citizen in a war.

Take this business of voluntary rationing, for example. You've heard people say, "We only drank two cups of tea before it was rationed. Even if we do cut down to only one how much shipping space will that save?" It will save very little—But, multiply that one cup by 13,000,000 and see what the saving is then!

Let's work it out. The saving of one cup of tea by every Canadian, taking 200 cups as equalling one pound, means a saving of 32½ tons of tea every day. A ton of tea occupies approximately 100 cubic feet of cargo space—so our one cup of tea saves 3,250 cubic feet.

What can a stavedore do with 3,250 cubic feet?

Well, roughly speaking, that is a pile eight feet high, 20 feet wide and 20 feet long. It would accommodate two Valentine tanks or goodness knows how many cases of rifles or Bren guns. The stavedore could load about 80 one ton aerial bombs in the same space or eight Universal Carriers.

One cup of tea a day. Multiply it by 365 days! Not bad? No, it's not but it's only a fraction of the cargo space that can be saved if all of us cut our tea consumption in half!

Of course it isn't spectacular, this voluntary contribution that works no hardship on us, but it is another way in which the Individual Citizen's

### GEMS OF THOUGHT

#### CAPACITY FOR GOOD

Goodness consists not in the outward things we do, but in the inward thing we are.—Chaplin.

The reality and individuality of man are good and God-made, and they are here to be seen and demonstrated; it is only the evil belief that renders them obscure.—Mary Baker Eddy.

Man's capacities have never been measured; nor are we to judge of what he can do by any precedents, so little has been tried.—Henry David Thoreau.

The reward of one duty is the power to fulfill another.—George Eliot.

The expectations of life depend upon diligence; and the mechanic that would perfect his work, must first sharpen his tools.—Confucius.

We cannot afford to be halfway in anything. The whole-hearted man is the one who succeeds in this world.—Mary E. Mizer.

## Must Continue To Manufacture Low Price Lines

Ottawa.—Continued manufacture of low-price lines of staple goods is compulsory under an order effective July 13, announced by the wartime prices and trade board.

The announcement said there was a danger that living costs might be affected by the disappearance of low-price lines of staple goods, even though there was no violation of the price ceiling.

The same policy is applied to sellers, other than manufacturers, and they are required to regulate their purchases so as to continue selling consumer goods in the same price range as in the corresponding seasons last year.

To meet this condition the board has adopted a policy that manufacturers of consumer goods must continue to produce and sell products of the same or substantially similar kind and quality, and in the same or approximately the same price ranges as those produced and sold in the corresponding period of 1941.

There is no objection to their decreasing the proportion of goods in the higher price range but any reduction in volume of goods in the lower price range is approved only if due to unavoidable circumstances, such as inability to obtain materials or a government order restricting production.

Evasion of the price ceiling by marketing new or modified products or changing trade descriptions is prohibited. For products substantially different in kind or quality from lines already on the market a maximum price or formula must be established by an administrator for the board before the goods are sold.

This price will be appropriate in relation to the price and relative value of comparable goods, the board's announcement said. The fact that one article cost more to produce than another will not alone justify a higher price.

In general the establishment of new lines is considered justifiable only if in the public interest. This might result from the necessity of using substitute materials, application of simplification and standardization methods or adoption of more efficient production methods which increase the value of the article or reduce its cost.

Where any new or modified product is substituted for or sold in place of any other product the manufacturer is to indicate this to all his customers, giving trade descriptions of both the product displaced and the modified one.

This action, the statement said, implements the board's determination that there should be in general no further increases by manufacturers or importers in the price of finished consumer goods, as distinct from materials or semi-finished goods intended for further manufacture.

Actual cost increases must be met by absorption of the "squeeze" somewhere along the line from the manufacturer or importer to the retailer, unless the goods are eligible for subsidy.

### EXCELLENT IDEA

Sending Clippings To Men Oversea Would Save Shipping Space

Ottawa.—Post office officials said a general campaign is being planned to encourage Canadians to send newspaper clippings rather than complete newspapers overseas.

The plan has already been presented to newspaper associations and is being sponsored by the Canadian Postmasters' Association.

"In most cases clippings are quite sufficient to give the news and would overcome the waste in shipping space which there is at present with thousands of papers being sent overseas," a departmental spokesman said.

### DEFENCE WEAPON

Britain Now Using Wire-Trailing Rockets Against Aerial Raiders

London.—Wire-trailing rockets have been disclosed officially as one of Britain's newest weapons of defence against aerial raiders.

The weapon, which has been in use to protect merchant ships for more than a year, was described as an apparatus which shoots a projectile that opens into a parachute from which long wires dangle.

The rockets, fired up as planes swoop to attack, often force them to veer off course or risk engagement in the wires.

### RECRUITING FIGURES

Percentages Are Given For The Different Military Districts

Ottawa.—Military District No. 3 (Toronto) has provided more than 19 per cent of the enlistments for active service in the Canadian army, it was reported in a reply tabled in the House of Commons for E. H. Corman (Lib., Wentworth).

Percentages of other districts are: No. 4 (Montreal) 12; No. 5 (Kingston, Ont.) 10; No. 11 (Victoria) 8; No. 10 (Winnipeg) 8; No. 13 (Calgary) 8; No. 6 (Halifax) 8; No. 1 (London, Ont.) 7; No. 12 (Regina) 7; No. 7 (Saint John, N.B.) 5; and No. 9 (Quebec) 4.

### THE CROW'S NEST

Men At Naval Barracks In Halifax Publish Bright Newspaper

Halifax.—A bright new monthly newspaper, published by and for naval ratings in Halifax, is off the press and being distributed to navy divisions across the country.

Its eight pages crammed with news and information of interest to the boys in blue, brightly illustrated with pictures and cartoons, the nautically named "The Crow's Nest" was put out by the men of H.M.C.S. Cornwallia, one of the naval barracks at Halifax.

## Many Changes In Air Schools In West Areas

Ottawa.—Royal Canadian Air Force headquarters announced on behalf of Air Minister Power that arrangements now have been completed for changes in the capacity and location of many schools operating under British Commonwealth Air Training Plan.

At Regina the E.F.T.S. will be greatly enlarged and the A.O.S. at Regina will be moved to Pearce, Alta.

At Prince Albert, Sask., the A.O.S. lapsed but the E.F.T.S. will be largely expanded "to take advantage of the excellent grass airfield and other facilities particularly adaptable to elementary training," and virtually all the staff of the A.O.S. will be absorbed by the E.F.T.S.

At Portage la Prairie, Man., the company now operating the E.F.T.S. will assume management of an enlarged R.A.F. E.F.T.S. at Assiniboia, Sask., to allow for expansion of the A.O.S. at Portage la Prairie.

At Chatham, N.B., the airfield is required for other purposes so the A.O.S. now located there will move to a new site at Davidson, Sask., the E.F.T.S. will be dropped and the civilian operating company will assume management of an enlarged R.A.F. E.F.T.S. at Neepawa, Man.

The announcement quoted Maj. Power as saying the changes are being made to implement agreements reached at the recent air training conference here to increase the flow of air observers and air navigators, and he added:

"These changes (in schools, together with expansion of existing schools on their present sites, are expected to provide adequately and economically for the revised plans made at the air training conference."

This is the list of other changes, some of which have been made public locally.

At Malton, Ont., airport expansion of the air observer school will necessitate closing down of the elementary flying training school and the operating company of the latter school will take over management of the Royal Air Force E.F.T.S. at DeWinton, Alta.

At Edmonton the air observer school expands and the E.F.T.S. operating company assumes management of the E.F.T.S. at Bowden, Alta., which also will be enlarged.

At Pearce the existing R.A.F. E.F.T.S. will be disbanded, "experience having shown that air conditions at Pearce are more suitable for the operation of heavy type aircraft than elementary trainers."

At London, Ont., the A.O.S. will be greatly increased in capacity and the E.F.T.S. there lapses;

At Winnipeg the A.O.S. will be greatly expanded.

At Quebec the E.F.T.S. lapses to provide adequate airfield and barracks space for an enlarged A.O.S.

At Rivers, Man., the Air Navigation School becomes the Central Navigation School, greatly expanded to train navigators as well as to continue production of navigation specialist officers;

At Hamilton, to provide for expansion of the R.A.F. A.N.S., the R.C.A.F. E.F.T.S. will be moved to a new site at Fendleton, Ont.

### REDRAFT OF BILL

More Plans Made To Settle Men On Land After War

Ottawa.—Hon. Cyrus MacMillan, chairman of the special House of Commons committee on land settlement, tabled in the house the fourth report of the committee, along with a redraft of bill 66, the measure providing for settlement on the land after the war of an estimated 25,000 ex-servicemen.

The fourth report added four recommendations to the bill. It asked the government to consider:

1. The feasibility of adopting a system in which the annual payments made by the settler would be adjusted in accordance with the relation of the prices of commodities he has to sell with those he has to buy.

2. A scheme whereby settlers under the act would be given first option on the purchase of tractors, trucks and other military equipment suitable for farm use when these are being disposed after the war.

3. Provision that at a later date the bill will be amended to provide for persons who have had service on ships and who are not in receipt of a disability pension.

4. The advisability of placing administration of the act under a new department which would deal exclusively with all matters pertaining to ex-servicemen and ex-service women.

### BAN STATISTICS

Publication Of External Trade Bulletin Will Not Be Permitted

Ottawa.—A blackout on external trade statistics considered to be of possible value to the enemy has been put into effect at the request of the directorate of censorship headed by Col. O. M. Biggar, the Dominion bureau of statistics said.

No longer to be issued are the following monthly bulletins: Summary of Canadian external trade; Canadian exports by commodities; Canadian imports by commodities; Canadian exports to principal countries and Canadian imports from principal countries.

Spokesmen for the bureau said that in eliminating them Canada is following the lead of the United Kingdom and United States.

### TAKES OVER COMMAND

Prime Minister Churchill revealed in Commons that Gen. Sir Claude Auchinleck, commander-in-chief in the Middle East, had relieved Lieut. Gen. Neil M. Ritchie of the 8th Army command and himself assumed the job of stopping the German drive through Egypt.

### REPLACING SUGAR

Fear Expressed That Honey Supplies Will Soon Be Exhausted

Edmonton.—Fear that honey will disappear from the shelves of the retail stores unless the wartime price board takes steps to regulate prices paid by industries "now using honey in place of the sugar they are forbidden to use" has been expressed by H. W. Love, Edmonton honey processor and distributor, in a letter to J. G. Taggart, food administration coordinator with the board.

### HELPED IN RAID

London.—A group of boys in the air training corps — now 20,000 strong — had a hand in the 1,000-plane raid on Cologne. They were clamping at an airfield and helped the ground staff load explosives and incendiaries into the bombers.

### HEAVY PUNISHMENT

Alexandria, Egypt.—The first whipping for profiteering here occurred when 15 convicted profiteers were given 30 lashes and three months imprisonment.

### Churchill Watches U.S. Paratroops

During a recent secret inspection visit to Fort Jackson, South Carolina, Prime Minister Churchill had a grandstand seat at a huge demonstration of U.S. paratroops in action. As he watched the troops dropping from the skies, Mr. Churchill, equipped with a ground unit of a plane-to-field radio, heard the orders to the troops, and when planes were flying overhead, held a two-way conversation with pilots.

### Canadian Brigadiers Named To New Posts

Appointments and promotion of Canadian army personnel announced at Ottawa include the naming of Brigadier G. A. McCarter (left) as commanding officer of the artillery of a Canadian corps; Brigadier H. O. N. Brownfield, M.C. (centre) to the staff of Gen. McNaughton, as senior artillery officer for the army, and the appointment of Brigadier M. H. S. Penhale (right) as brigadier, general staff, at headquarters of the Canadian army overseas. Lt.-Col. C. Vokes, 38, of the Royal Canadian Engineers, is appointed to command an infantry brigade with the rank of brigadier. Lieut.-Col. H. J. B. Keating, formerly embarkation commandant for eastern ports, has been appointed director of supply and transport with the rank of colonel. He will be assigned to the quarter-master-general's branch at national defence headquarters and replaces Col. Harry O. Lawson, 56, who retires on pension.

### DETAILS SECRET

Britain Not Giving Out News About New Secret Weapons

London.—A fast-minute censorship was imposed on the disclosure of a spectacular development in Britain's anti-aircraft defence after the London Daily Mail had protested against the revelation.

This was not the new wire-trailing rocket used to tangle enemy planes, which was officially announced earlier.

Details of the new secret weapon, the result of five years of experimentation, had been released when the censorship was imposed with the explanation that "new instructions have been issued."

A front-page criticism by the Daily Mail against exposing the weapon presumably influenced the decision.

The new device, it was said, has already been used successfully against enemy raids.

### GOOD SEAMANSHIP

Won Distinguished Service Cross For Commander Of Canadian Corvette

London.—Acting Lt.-Cmdr. W. E. S. Briggs, R.C.N.R., whose seamanship resulted in saving the torpedoed tanker Tarheel, received the Distinguished Service Cross from the King at a recent investiture at Buckingham Palace. It was announced.

He won the award while in command of H.M.C.S. Orilla last winter, when the Canadian corvette helped the disabled tanker into a British port, saving a \$1,000,000 cargo of oil.

### AIRPLANE SPRUCE

New Company Is Going To Develop And Increase Production

Ottawa.—Aero Timber Products, Ltd., a new crown company with head office in Vancouver, was incorporated June 19, to develop and increase production of airplane spruce for Canada and Britain, it was announced by Munitions Minister Howe.

"The company will control conversion of airplane spruce from logs into lumber for a greater recovery of grades and specifications suitable for the vital airplane requirements," Mr. Howe's statement said.

## Would Process Our Coal Output After The War

Ottawa.—Dr. R. C. Wallace, principal of Queen's University, forecast before the House of Commons committee on reconstruction and re-establishment that after the war Canada's coal output will be processed to much greater degree to provide for easier transportation, instead of setting up heavy industries near coal sources.

Cooking and briquetting were processes which would be developed in post-war years, except in the case of Vancouver Island coal, he said. He said it was contemplated the Vancouver Island coal would be used for an iron and smelting industry at the coast.

"Heavy industries will grow on the coast as we develop the coal resources there," he said.

On the prairies, coal and water power, developed together, would provide for greater electrification of rural Canada.

Hydro-electric power would be another important factor in Canada's post-war economy. Development had been rapid in recent years and there was now 9,000,000 horsepower available, about one-third of this was being used entirely in war industry.

"That means that there will be a great deal of excess power following the war. The use of this power in industry will be a large problem. There will be a great amount of cheap power available which we must find productive industrial use."

Dr. Wallace, chairman of the committee on conservation and development of natural resources set up under the interdepartmental advisory committee on post-war reconstruction, said he would like to see some of this power diverted to electrification of the farm and the farm home.

"And," he added, "I would like to see a decentralization of industry into the rural districts. This is another post-war problem."

"The country and the government itself might make possible the bringing of electricity to rural districts," said Dr. Wallace. "Such a move would assist the stabilisation of post-war economic life."

In answer to a question regarding the development of an iron industry on the British Columbia coast as a post-war project, Dr. Wallace said that Tesado Island was the project which had been considered, since iron and limestone were nearby.

The plant would produce 75,000 tons a year and the ore could be smelted at Comox, rather than at Vancouver where it would cause greater centralization of population.

## Allied Forces In Egypt Are Much Stronger

Cairo.—The Allied air forces—British, Australian, South African and American—are in a stronger position now than when the present campaign began six weeks ago, the R.A.F. disclosed.

In the 42 days, it was announced, 134 Axis planes were shot down in air combat for certain, more than 100 more were destroyed on the ground and 50 by anti-aircraft defences. The number of planes listed as probably shot down run into the hundreds more.

During the same period 110 Allied pilots were listed as missing—figures corresponding only roughly to plane losses because many planes shot down have been repaired and are flying again.

Since Nov. 18, 1941, more than 453 Axis aircraft have been shot down for certain in the western desert alone, while those listed as probably destroyed run into the thousands. This does not include Axis losses over Malta.

The weather is getting seasonally cooler in the Nile valley and on the western desert battlefield, with daytime temperatures now ranging from 90 to 110 Fahrenheit.

Oddly, July is cooler usually than May and June when the temperatures sometimes hit a maximum of 130.

From the daytime high of 110, the temperature drops as low as 70 in the July nights and it is chilly in the desert dawn.

Personal comfort depends largely on the wind which usually blows for 50 straight days at a time, blowing enervating and extremely irritating dust clouds across the wastes of the desert.
